Management Engineering student at the University of Waterloo with go-to-market experience across NVIDIA, Groq, and Untether AI. Experienced in applying AI solutions and data analytics to drive strategic product decisions and sales growth.

Experience

NVIDIA
Jan 2026 – April 2026

GTM Data Analyst Intern *Santa Clara, CA*

- Analyzed revenue and pipeline data in Databricks and Tableau to surface trends and deliver actionable recommendations that informed strategic sales decisions.
- Developed AI-powered tools and automated workflows using Clay to streamline prospecting, lead qualification, and company research across the sales funnel.
- Monitored campaign and customer engagement metrics via Adobe Analytics and Salesforce, supporting data-driven marketing strategies and improved revenue visibility.

Groq
May 2025 – Jan 2026

RevOps & Deal Desk Associate *Toronto, ON*

- Owned core GTM business infrastructure across billing, compliance, deal desk and revenue operations.
- Led quote-to-cash process design for major enterprise partnerships, developing custom pricing models and RFQ responses that supported closing high-value customer deals.
- Streamlined sales operations by documenting end-to-end GTM workflows in LucidChart, managing billing cycles with Lago, and enriching 5,000+ CRM accounts using Clay AI.
- Won Groq's company-wide intern hackathon by rapidly prototyping a multimodal accessibility app combining vision, speech, and text models to identify products for users with visual impairments.

Untether AI
Sep 2024 – Dec 2024

Sales Development Representative *Toronto, ON*

- Leveraged prospecting tools to identify and target key accounts, securing high-value clients across different sectors.
- Contributed to 10+ customer meetings to propose tailored solutions and drive conversion; translated feedback into actionable engineering tickets for the product roadmap.
- Spearheaded an internal initiative that revamped the Quote-to-cash process and sales documentation.

Untether AI
Jan 2024 – Apr 2024

Product Management Intern *Toronto, ON*

- Utilized Google Analytics and UTMs to monitor web traffic and engagement, driving data-driven marketing strategies that doubled web traffic and increased leads by 2.7x.
- Conducted market and competitive analysis on AI solutions to inform strategic product positioning and authored customer-facing materials to articulate the company's value proposition.

Ansys
May 2023 – Aug 2023

Business Development Intern *Waterloo, ON*

- Leveraged SFDC and Sales Navigator for prospect analysis to drive targeted engagement, increasing the lead qualification rate by 20% for the quarter.
- Developed metrics by analyzing usage reports to reinforce value propositions and boost customer satisfaction.
- Organized and executed customer engagement events, contributing over $1M to the opportunity pipeline.

Education

University of Waterloo
Waterloo, ON

Honors Bachelor of Applied Science in Management Engineering *Sep. 2022 – Apr 2027*
